PROFESSIONAL SUMMARY

Senior Creative Designer with 7+ years spanning brand identity, motion graphics, photorealistic 3D visualization, and real-time interactive experiences. Owns the brief end to end — concept, art direction, production, delivery — across digital, print, video, and immersive channels for global clients. Built 10+ production-ready Unreal Engine 5 experiences, 150+ brand and campaign assets, and 30+ international presentation decks. Integrates AI-assisted workflows (Midjourney, Firefly, Runway) to accelerate delivery without compromising craft. Remote-first professional with deep experience in async collaboration, independent ownership, and mentoring across time zones.

CORE SKILLS

- Brand & Visual Design:** Identity Systems, Art Direction, Typography, Campaigns, Layout, Brand Guidelines, Packaging, Social & OOH
- Motion & Video:** Motion Graphics, 2D Animation, Kinetic Typography, Video Editing, Title Sequences — After Effects, Premiere Pro
- 3D Visualization:** Photorealistic Product Viz, Hard-Surface Modelling, PBR Texturing, Studio Lighting, Compositing — Blender, 3ds Max, Substance Painter
- Real-Time & Interactive:** Unreal Engine 5, Blueprint Visual Scripting, Lumen GI, Gamified Walkthroughs, Interactive Environments
- Presentation & Editorial:** PowerPoint Systems, Interactive PDFs (InDesign), Data Visualization, Iconography, Infographics
- AI-Assisted Design:** Generative Concepting, AI Storyboarding, Accelerated Production — Midjourney, Firefly, Runway
- Tools & Ways of Working:** Adobe Creative Suite, Figma, Adobe XD, Canva · Remote-first, Async (Slack/Teams/Zoom), Multi-project Ownership, Mentoring

PROFESSIONAL EXPERIENCE

Immersive Tech Specialist · Senior Creative Designer

Sutherland Global Technologies — Hyderabad, India (Hybrid) | Feb 2025 – May 2026

Joined under ATMECS Global Inc; continued in the same role under Sutherland following operational integration in August 2025.

- Delivered 10+ production-ready real-time interactive experiences in Unreal Engine 5 — environment design, Lumen lighting, and complete Blueprint interaction systems
- Produced 20+ photorealistic Blender product visualizations using PBR workflows and cinematic lighting for enterprise technology projects
- Directed creative quality standards, brand consistency, and visual design language across campaign and product communication outputs
- Integrated AI-assisted design tools (Midjourney, Firefly, Runway) into production workflows — reduced concept-to-delivery timelines by ~30%
- Produced motion graphics and animated content in After Effects and Premiere Pro; mentored team members on design standards and execution quality

Visualiser · Senior Creative Designer

Mott MacDonald Pvt. Ltd. — Noida, India (Hybrid) | Apr 2021 – Jan 2025

- Delivered 50+ visual assets for global projects across 5+ countries — campaign creatives, landing pages, branded communications — improving client engagement by 25%
- Designed 30+ presentation decks for international client engagements — slide systems, typography, animated diagrams, data visualization, and interactive PDF guides
- Designed and maintained brand identity systems ensuring visual and typographic consistency across digital, print, and presentation formats
- Created motion graphics and animated explainer videos for global campaigns; produced 3D visualizations supporting engineering and marketing teams
- Reduced average turnaround ~20% by building reusable component libraries and standardized brand asset systems

Freelance Creative Designer

Independent Practice — Remote, India | Apr 2019 – Mar 2021 · Instagram @zuhviz

- Delivered 15+ brand identity and campaign projects for retail, services, and digital clients — 100% on-time completion, 90%+ client retention
- Owned projects end to end — concept through final delivery — managing 4–6 concurrent briefs with minimal supervision; client base built entirely on referrals

SELECTED PROJECTS

- **NeuraSphere** — End-to-end brand creation: identity system, photoreal 3D product film, brand guidelines, and launch campaign across motion and digital
- **Gamified Real-Time Environment** — Navigable interactive UE5 experience with Blueprint logic, Lumen lighting, and in-engine post — delivered as a live client project
- **Casio Edifice Product Film** — Cinematic 3D visualization built entirely in Blender: modelling, PBR materials, lighting, animation, and grade
